Portfolio

EDUCATION

Beijing Institute of Technology (BIT) — 985/211/Double First-Class Sep 2026 - Jun 2029 (Expected)

M.S. in Intelligent Science and Technology · School of Artificial Intelligence

Research Focus: **Safety alignment of multimodal large language models**

Guizhou University — 211/Double First-Class Sep 2022 - Jun 2026

B.S. in Artificial Intelligence · School of Computer Science and Technology

Weighted Average Score Ranking: **1/69** · Comprehensive Score: **1/69** · GPA: **4.14/5**

IELTS: **6.5** · CET-6: **572** · Fluent in academic English reading, writing, and communication

RESEARCH EXPERIENCE

Research output: **1 KSEM conference paper (CCF-C)**.

Cognitive Intelligence for Judicial Verdicts: Knowledge-Experience Dual-Track Fusion (Project Lead)

Mar 2025 - Present · Legal AI · Knowledge and precedent retrieval

- Designed a novel RAG framework for legal verdict prediction, fusing legal knowledge with judicial precedents as dual guidance for LLMs
- Engineered a multi-model pipeline: 7B LLM for crime element extraction → Milvus vector DB for precedent retrieval → 30B LLM for verdict generation
- Combined legal provisions and precedents with case facts as context for verdict generation

Safety Alignment of Multimodal Large Language Models

2026 - Present · Master's research focus

- Master's research focus: safety alignment methods for multimodal large language models

Intelligent Q&A System for Government Services (Project Lead)

Mar 2024 - Present

- Architected end-to-end LLM-driven Q&A platform for government services using FastAPI
- Developed core Q&A logic with Langchain framework, managing LLM API selection, invocation, and orchestration
- Successfully deployed functional web-based prototype with real-time query capabilities

SELECTED OPEN-SOURCE PROJECTS

AI Stock Screening & Quant Research Toolchain · 41 Stars

GitHub: 41 Stars · 8 Forks (as of 2026-10-24)

Built 30 original Agent Skills and 32 Python scripts across 23 investment-method reference frameworks. Delivered financial screening, factor ranking, consensus and cost-aware backtesting with input hashes and holding-level audit trails.

Passed 40 local tests (2026-10-25); added a one-command offline demo with reports, CSVs and logs.

Retrieved real FY2021–2025 financials for 600519 with AKShare 1.19.3 on 2026-10-24.

Python · AKShare · pandas · Agent Skills · Run the demo · Validation record · Live-data run

Exam Builder & Assessment System

Build a Flask + SQLite application for question banks, exam assembly, student answers, objective grading, teacher review and score reports, with offline math rendering and Excel import/export.

Flask · SQLite · JavaScript · KaTeX · paper-builder-system

PPT Refactoring & Validation Workflow

Standardize slide titles, colors and typography with Python; measure text overflow in PowerPoint, adjust font sizes and produce audit reports with regression checks.

Python · python-pptx · PowerPoint · beiligong-ppt-skill

Beijing Guizhou Food Map

Provide a source snapshot with a React web app, API, SQLite data layer and Taro mini program for map-based restaurant discovery and feedback; the demo uses synthetic data.

TypeScript · React · SQLite · Taro · beijing-food-map-workspace

AI Agent Session Analytics CLI

Parse local coding-agent session logs and report token usage, estimated costs and tool calls through terminal and JSON output.

Node.js · JavaScript · CLI · agent-trace

Finance RSS Reader & Digest Tools

Adapt Qiaomu AI RSS into an Obsidian finance reader with 45 feeds, Markdown saving, daily-note excerpts and OPML; build a companion Feishu digest tool with deduplication, grouped cards and batched delivery.

TypeScript · Obsidian API · Node.js · Feishu digest

INTERNSHIP EXPERIENCE

Xueersi (学而思) — Education Technology Company

Guiyang

Intern · Education Product Development

Developed education products leveraging AI to improve teaching and learning experiences

Caihong Group (彩虹集团) — Technology Enterprise

Chengdu

Intern · Enterprise Software Development

Participated in enterprise-level project development, gaining industry-standard software engineering practices

GLOBAL EXPERIENCE

SG National University of Singapore (NUS)

Jul 2023 - Aug 2023

- Selected for **"Guizhou Provincial Thousand Talents Program"** (competitive, funded initiative)
- Advanced training in AI theory and computational finance modeling
- Independently built "Handwritten Digit Recognition" system
- Collaborated with international team entirely in English on financial engineering project

HONORS & AWARDS

Huawei ICT Competition · National First Prize

National Scholarship

Guizhou Provincial Merit Student

TECHNICAL SKILLS

LANGUAGES

Python · TypeScript · JavaScript · Go · Rust · LaTeX

AI / ML

PyTorch · Transformers · LangChain · OpenAI API · RAG · MCP

FRONTEND

React · Next.js · Vue · Tailwind CSS

BACKEND & DEVOPS

FastAPI · Node.js · PostgreSQL · Docker · GitHub Actions
